Note: Significant institutions at the highest level of consolidation for which common reporting on capital adequacy (COREP) and financial reporting (FINREP) are available. The list of banks used for the various reference periods may differ as the list of significant institutions changes and as banks start to report under FINREP obligations. Specifically, there are 102 banks in the third quarter of 2015, 117 in the fourth quarter of 2015 (increase in FINREP reporting obligations), 123 in the first quarter of 2016, 124 in the second quarter of 2016 (changes in the list of significant institutions and FINREP reporting obligations) and 122 in the third quarter of 2016. The number of entities per reference period is expected to stabilise in future, with any changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, which generally occur on an annual basis.

**T01.04 Concentration of total assets**  
(cumulative percentages of total assets)

Source: ECB.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available.

The charts show the cumulative percentage of the total assets in the sample which is covered when the total assets of each institution, ordered from the largest to the smallest, are added. For instance, it is shown that the largest institution in the sample accounts for almost 10% and the 20 largest institutions represent approximately 75% of the total assets in the sample. The solid line in red corresponds to the 75th percentile.

1) Profit and loss statement figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.

2) Figures reported are year-to-date.

3) Operating income before administrative expenses and depreciation are deducted. In instances where this item is negative, the allocation of the bank to one of the three categories is based on the area of activity which is dominant for that bank. This is identified by taking the highest of the absolute values of net interest income, net fee and commission income and net trading income (including foreign exchange gains and losses) in the reference period considered. In such circumstances, a bank classified under the "mostly net trading income and foreign exchange gains and losses" category can have a smaller amount of trading income compared with the other two categories.

4) Provisions include provisions for "commitments and guarantees given" and "other provisions".

5) This item includes also "extraordinary profit or loss before tax".

1) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

2) Profit and loss statement figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.

3) Figures reported are year-to-date.

4) Operating income before administrative expenses and depreciation are deducted.

5) Provisions include provisions for "commitments and guarantees given" and "other provisions".

6) This item includes also "extraordinary profit or loss before tax".

Note: Significant institutions at the highest level of consolidation for which common reporting on capital adequacy (COREP) and financial reporting (FINREP) are available. The list of banks used for the various reference periods may differ as the list of significant institutions changes and as banks start to report under FINREP obligations. Specifically, there are 102 banks in the third quarter of 2015, 117 in the fourth quarter of 2015 (increase in FINREP reporting obligations), 123 in the first quarter of 2016, 124 in the second quarter of 2016 (changes in the list of significant institutions and FINREP reporting obligations) and 122 in the third quarter of 2016. The number of entities per reference period is expected to stabilise in future, with any changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, which generally occur on an annual basis.

1) RoE and RoA are computed by dividing "net profit/loss" by, respectively, "equity" and "total assets" at the end of the corresponding reference period. The values of "net profit/loss", originally year-to-date, are annualised to increase the comparability of the ratios across quarters.

2) Returns figures may be based on different financial years. To increase consistency, if the end of the financial year is not 31 December, a linear projection of the figures has been made for each reporting period.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available.

1) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

2) This item includes non-trading debt instruments measured using the cost-based method for national accounting standards (nGAAP) reporters.

3) This item includes non-trading non-derivative financial assets measured at fair value through profit or loss for nGAAP reporters.

4) Includes nGAAP trading portfolios.

Notes: Significant institutions at the highest level of consolidation for which common reporting on capital adequacy (COREP) and financial reporting (FINREP) are available. The list of banks used for the various reference periods may differ as the list of significant institutions changes and as banks start to report under FINREP obligations. Specifically, there are 102 banks in the third quarter of 2015, 117 in the fourth quarter of 2015 (increase in FINREP reporting obligations), 123 in the first quarter of 2016, 124 in the second quarter of 2016 (changes in the list of significant institutions and FINREP reporting obligations) and 122 in the third quarter of 2016. The number of entities per reference period is expected to stabilise in future, with any changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, which generally occur on an annual basis.

1) In line with IAS 37.10 and IAS 1.54(l).

2) Computed as the difference between "total liabilities and equity" and the sum of the other sub-categories.

3) Computed as the difference between "equity" and the sum of the other sub-categories.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available.

1) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

2) In line with IAS 37.10 and IAS 1.54(l).

3) Computed as the difference between "total liabilities and equity" and the sum of the other sub-categories.

4) Computed as the difference between "equity" and the sum of the other sub-categories.

Notes: Significant institutions at the highest level of consolidation for which common reporting on capital adequacy (COREP) and financial reporting (FINREP) are available. The list of banks used for the various reference periods may differ as the list of significant institutions changes and as banks start to report under FINREP obligations. Specifically, there are 102 banks in the third quarter of 2015, 117 in the fourth quarter of 2015 (increase in FINREP reporting obligations), 123 in the first quarter of 2016, 124 in the second quarter of 2016 (changes in the list of significant institutions and FINREP reporting obligations) and 122 in the third quarter of 2016. The number of entities per reference period is expected to stabilise in future, with any changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, which generally occur on an annual basis.

Only relevant components of risk exposures have been reported.

1) CCP stands for central counterparty.

2) SA stands for standardised approach.

3) IM stands for internal model.

4) BIA stands for basic indicator approach.

5) TSA stands for traditional standardised approach. ASA stands for alternative standardised approach.

6) AMA stands for advanced measurement approach.

7) Includes "additional risk exposure amount due to fixed overheads", "total risk exposure amount related to large exposures in the trading book" and "other risk exposure amounts".

1) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

2) CCP stands for central counterparty.

Notes: Significant institutions at the highest level of consolidation for which common reporting on capital adequacy (COREP) and financial reporting (FINREP) are available. The list of banks used for the various reference periods may differ as the list of significant institutions changes and as banks start to report under FINREP obligations. Specifically, there are 102 banks in the second and third quarters of 2015, 117 in the fourth quarter of 2015 (increase in FINREP reporting obligations), 123 in the first quarter of 2016, and 124 in the second quarter of 2016 (changes in the list of significant institutions and FINREP reporting obligations). The number of entities per reference period is expected to stabilise in future, with any changes resulting from amendments to the list of SIs following assessments by ECB Banking Supervision, which generally occur on an annual basis.

1) Loans and advances in the asset quality tables are displayed at gross carrying amount. In line with FINREP: i) held for trading exposures are excluded, ii) cash balances at central banks and other demand deposits are included.

2) HFT stands for held for trading.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available.

1) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

2) Loans and advances in the asset quality tables are displayed at gross carrying amount. In line with FINREP: i) held for trading exposures are excluded, ii) cash balances at central banks and other demand deposits are included.

Notes: Significant institutions at the highest level of consolidation for which common reporting (COREP) and financial reporting (FINREP) are available.

1) Risk-based classification using Supervisory Review and Evaluation Process (SREP) results. Non-rated banks are those which have not been assigned a score in a specific SREP cycle, owing for example a recent change in significance, a merger or restructuring, etc. Classification as non-rated does not therefore necessarily indicate a high risk.

Source: ECB.

Notes: The overview of the data quality findings shows the number of findings by dimension at the date for submission of reports to the ECB (i.e. 25 November 2016) and their evolution up to 31 December 2016. The percentage of resolved issues is also disclosed. The quality of the published data is assessed following the ECB Statistics Quality Framework (see link below) along the following dimensions.

(1) Punctuality: refers to the time lag between the submission date and the actual submission of the data to the ECB.

(2) Accuracy and consistency: accuracy is considered to be the absence of mistakes and exact correspondence of the reported values with the underlying concept for each data point. It is quantified using the number of failing validation rules and completeness checks affecting only one template. Consistency is defined as the satisfaction of logical relationships between different subsets of the data (i.e. across templates).

(3) Stability: is investigated by examining changes between periods in the total number of data points reported per report.

(4) Completeness: is defined as the availability of the required information. This is based on a set of expected data points defined as significant to be reported by all institutions, irrespective of their business model, size or country of origin.

(5) Plausibility: the checks aim to detect outliers in the reported data. Outlying values are flagged and analysed further from a supervisory perspective.

Notes: The chart shows the evolution between the second and third quarter of 2016 in terms of punctuality, showing the percentages of the total expected submissions for received, rejected and missing reports at the date for submission of reports to the ECB (i.e. 25 November 2016 for the third quarter; 29 August 2016 for the second quarter).

The status "received fully valid" denotes reports received by the ECB with no European Banking Authority (EBA) validation rule failing. The status "received with errors" denotes reports received by the ECB containing failing EBA validation rules. The status "missing" denotes reports expected but not received by the ECB. The status "rejected" denotes reports not accepted by the ECB owing to technical errors in the submission.

The following abbreviations have been used:

AE: asset encumbrance;

COREP: common reporting;

LCR: liquidity coverage ratio; Q3 refers to the new ITS following the EC Delegated Act; comparison with the second quarter of 2016 is not applicable.

LE: large exposures;

NSFR: net stable funding ratio;

ALMM: additional liquidity monitoring metrics;

FINREP: financial reporting.

### T05.03 Data quality: accuracy and consistency (number of validation rules; percentages)

Finding	Q3 2015	Q4 2015	Q1 2016	Q2 2016	Q3 2016
Failing validation rules	118	110	107	120	84
Applicable validation rules	1,897	2,262	1,892	2,134	2,108

Source: ECB.

Notes: The chart shows the number and percentages of failed validation rules (VRs) compared with the total applicable validation rules according to the taxonomy published by the European Banking Authority (EBA) for each reporting period. This measures the accuracy of the reports received with respect to compliance with EBA validation rules. The reports considered are: asset encumbrance, common reporting, liquidity coverage ratio, large exposures, stable funding ratio, additional liquidity monitoring metrics and financial reporting. For this chart a cut-off date of 9 December 2016 is applied for all periods prior to the third quarter of 2016; the chart reflects reports that were not submitted to the ECB by the agreed submission date 25 November for the third quarter of 2016 reports.

## T05.04 Data quality: stability

(number of data points)

Reference period	COREP	FINREP	LE	ALMM	NSFR	AE
Q2 2016	1,476,281	642,897	2,067,156	601,929	78,844	21,493

Percentage difference	1.31%	-2.90%	3.82%	5.39%	5.40%	7.19%

Source: ECB.

Notes: The charts show the number of data points reported and the change between the second quarter of 2016 and the third quarter of 2016 as at the date for submission of reports to the ECB (i.e. 25 November 2016 for the third quarter; 29 August 2016 for the second quarter). The charts capture the degree of stability in the number of data points reported by the institutions.

The following abbreviations are used:

COREP: common reporting;

FINREP: financial reporting;

LE: large exposures;

LCR: liquidity coverage ratio; the third quarter of 2016 refers to the new ITS following the EC Delegated Act; comparison with the second quarter of 2016 is not applicable.

NSFR: net stable funding ratio;

AE: asset encumbrance;

ALMM: additional liquidity monitoring metrics.

Notes: The table shows submitted data points as a percentage of a set of pre-defined data points that are considered essential by supervisors to completing key supervisory tasks and have to be reported by all institutions irrespective of their size, business model or country of origin. The analysis is completed as at the date for submission of reports to the ECB for the third quarter of 2016 (i.e. 25 November 2016 for the third quarter, 29 August for the second quarter). Since some business models make certain data points redundant for individual entities, 100% completeness is not possible and rates over 80% are considered as satisfactory.

The following abbreviations are used:

COREP: common reporting;

FINREP: financial reporting;

AE: asset encumbrance;

LCR: liquidity coverage ratio; the third quarter of 2016 refers to the new ITS following the EC Delegated Act; comparison with the second quarter of 2016 is not applicable;

NSFR: net stable funding ratio;

N.A.: not applicable.

## T05.06 Data quality: plausibility

(number of detected non-plausible values)

Outlier hierarchy (Q3 2016)	Number of outliers selected
1	178
2	80
3	223
4	372
<b>Total</b>	<b>853</b>

Source: ECB.

Note: The table shows the number of outlying values (potentially non-plausible values) selected in data reported for the third quarter of 2016 as at the date for submission of reports to the ECB (i.e. 25 November 2016). The findings are based on a broader subset of data points considered key for supervisory activities compared to that used for completeness. The table shows findings after the application of a hierarchy of prioritisation (i.e. "1" relates to the category with highest priority and "4" the category with the lowest priority) based on a combination of several indicators.
